The HIS Insonic range of inserts can be installed with heat or ultrasonics. They are designed to provide strong reusable thread forms in Thermoplastic materials. The unique diametrically opposing helix knurls create the herringbone pattern which provides exceptional resistance to torque loads and facilitates the flow of plastic into the two recessed grooves providing greater pullout loads than alternative designs. This headed version provides a larger clamping surface to prevent jack out.Materials and Finishes:- Brass Self ColourTo Specify Use: Series No / Part No (eg 20106 HIS020H046)
