Self Clinch Through Stand Off

Self Clinch Through Standoffs provide a strong female thread in sheet metal. They are designed to provide a flush finish on the reverse side and are available in various lengths to allow components to be mounted at the required stand off distance from the sheet. They are installed using a squeezing action with a press whilst supporting the reverse side. The through hole allows screws to be mounted from both sides.Materials & Finishes:-Heat Treated Carbon Steel Trivalent Zinc (Code 60)303 Stainless Steel Self Colour (Cose SS) To Specify use Series No / Part No / Length / Finish Code eg 30314 03COM10 60
