DNT120H140	M12	16.3	13.97

The DNT range of inserts are designed for over moulding and can be used in all types of moulding processes. They are located on a plain pin in the mould tool and the large wall thickness allows the tool faces to clamp on either end providing a flush finish. The coarse knurl and grooves provide excellent rotational and pull out resistance.

All information is given for guidance only and designers should satisfy themselves as to the suitability of the specification by requesting samples
